Prize-Winners at Claresholm and Granum Exhibitions

Both Fairs Were Great Triumphs for Their Respective Managements

PRIZES BETTER DISTRIBUTED THAN IN OTHER YEARS

Difficulties confronted the placing of the lists of winners at the two sister Fairs, before our readers this week. The Claresholm list is complete. The winners in the live-stock section only, at the Granum Fair has been received up to going to press. This list will be continued in another issue. The two Fairs are well attended from the point of view of the excellence and quantity of exhibits. The effect of these annual exhibitions is being seen in the improved quality of the stock in this district. This year there were more competitors and the competition in each class was keener than before. Next year probably greater interest will be shown by our neighbors in this domain who surround us in classes in their own realm produced at both fairs, but especially at Claresholm, a most wonderful range for the work of the needle, fish and pen, and the bachelors of this section of the West have the brightest prospects before them. Our supply of Captain's hats and caps is to be had in the fair-wearers who know that no discount was intended. The bachelors who seen the list may be disappointed but if any anxious enquirer wishing further information as to the Mrs. and Miss will call we shall be pleased to furnish any further information not given by the last. As to ages, color of hair and eyes, we leave our customers to protect. We trust all our friends to the sly who have done so much to make the two Fairs so evidently successful in all departments in which they bless their dear hearts.

Claresholm Fair 1913

STOCK SECTION

Heavy Horses

Clydesdales

Stallions 4 years and over 1st Maurice Wall; Brood Mare with foal 1st J. A. Gaudin; 2nd C. E. Tillotson; Three years old 1st John McConchy; 2nd James Robins; Foal 1st J. A. Gaudin; 2nd A. Livingstone; Dry Mare 1st John McConchy; 2nd G. F. Currie; Percherons

Stallions 4 years and over H. Paulson; 2nd Rees Thomas; Shires

Stallions 4 years and over T. D. Lewis; Belgians

Stallions 4 years and over 1st Mack Stevenson; Heavy Draft Grade

Brood Mare with foal 1st C. E. Tillotson; 2nd W. H. Lewis; Foal 1st C. E. Tillotson; 2nd R. Bowes; 3rd W. H. Lewis

Two years old 1st G. F. Beatty; 2nd Stewart Ranch

Three years old 1st H. Lamont; 2nd J. A. Gaudin; 3rd C. E. Tillotson

Mare or geld over 3 years 1st W. H. Lewis; 2nd J. A. Gaudin; 3rd J. A. Gaudin

To go to wagon 1st J. A. Gaudin; 2nd W. H. Lewis; 3rd J. A. Gaudin

Agricultural

Brood Mare in foal 1st B. A. Shearer; 2nd J. S. McAlpine; 3rd R. Brown

Foal 1st J. A. Gaudin; 2nd J. S. McAlpine; 3rd R. Brown

Yearling 1st Alex McKay; 2nd J. A. Gaudin; 3rd K. McKeown

Two year old 1st Alex McKay; 2nd G. F. Beatty; 3rd J. A. Gaudin

Three year old 1st Alex McKay; 2nd Alex McKay; 3rd J. A. Gaudin

Mare or geld over 3 years 1st T. Guy; 2nd J. S. McAlpine; 3rd J. A. Gaudin

General Purpose

Brood Mare with foal 1st McKay

Bro: 2nd Stewart Ranch; 3rd F. A. Burton; Mare or Geld in harness 1st Stewart Ranch; 2nd Maurice Wall; Three year old 1st Stewart Ranch; 2nd F. A. Burton; 3rd C. F. Nowlin; Team to wagon 1st Ed Strangways; 2nd John Crouch; 3rd Stewart Ranch; Special

Best heavy team not less than 3000 lbs 1st C. E. Tillotson; 2nd J. A. Gaudin; 3rd W. H. Lewis

Best foal by Camborne R. A. Gouldin

Best foal by Star Markham W. H. Quail

Best foal by Rosedale A. A. Livingston

LIGHT HORSES

Thoroughbred

Stallion 4 years and over 1st F. W. Elliott; 2nd P. L. Cox

Broad Mare with foal J. R. Watt

Foal staled from thoroughbred 1st

C. F. A. Leeks; 2nd J. R. Watt

Yearling staled from thoroughbred 1st W. H. Nowlin; 2nd C. F. A. Leeks; 3rd J. A. Gaudin

2nd F. A. Williams

Special best foal by Noshwak given by F. W. Elliott C. F. A. Leeks

Champion Thoroughbred Stallion F. W. Elliott

Standbreds

Stallion 3 years and over 1st C. Booth

Broad mare with foal 1st Stewart Ranch; 2nd F. A. Wright

Yearling staled from thoroughbred 1st W. H. Nowlin; 2nd C. F. A. Leeks; 3rd J. A. Gaudin

2nd F. A. Williams

Special best foal by Noshwak given by F. W. Elliott C. F. A. Leeks

Stallion 4 years and over 1st F. W. Elliott

Pair ewes 2 yrs or over 1st M. Well

Pair Yearling ewes 1st R. A. Shearer

Beef Cattle

Cow 3 yrs and over 1st Carl Milnes

2nd P. J. Petersen

Hofster cow 2 yrs old 1st R. Brown

Hofster calf 1st gold 1st H. Wright

Stallion 2 yrs old 1st J. A. Gaudin

Sheep

Ram 1st M. Wall

Lamb 1st M. Wall

Pair ewes 2 yrs or over 1st M. Well

Pair Yearling ewes 1st R. A. Shearer

SWINE

Yorkshires

Bovine one yr 1st R. A. Shearer

Bovine under 1 yr 1st R. A. Shearer

Sow 1 yr or over 1st R. A. Shearer

Sow under 1 yr 1st R. A. Shearer

Breed sow with litter 1st H. Wright

Berkshire

Bovine yr or over 1st H. Wright

2nd J. V. Vance

Bovine under 1 yr 1st Fred Anderson

Two year old 1st Stewart Ranch; 2nd J. A. Gaudin; 3rd C. E. Tillotson

Three year old 1st Alex McKay; 2nd F. A. Elliott; 3rd J. E. Moffatt

2nd Stewart Ranch

Four year old 1st C. Booth; 2nd W. L. Lehman; 3rd A. E. Ellis

Team to Buggy 1st J. E. Moffatt

Pair mare or geld 1st J. A. McCullough; 2nd W. R. Stillwell; 3rd C. Booth

Dry Mare 1st C. Booth; 2nd Stewart Ranch

Stallion 3 years old 1st C. Booth

Four year old 1st C. Booth; 2nd F. A. Burton

WHERE DO YOU SHOP?

Do you shop in a brisk, active store, or in a dull store?

Advertising makes bright stores. Failure to advertise goes hand in hand with dullness and stagnation

Advertising brushes away cobwebs and dust, sharpens shop windows, quickens the intelligence of salesmen, and lets in the sunlight.

Advertising makes the merchant think of you—of your wants and needs; makes him anxious to serve you to your liking and advantage.

Advertising keeps stock from having birthdays.

Advertising acquaints you with new things, and so brightens your home, your life, your person.

Advertising keeps a business from growing lazy and stupid. Advertising injects good red blood into the arteries of a business, and keeps it healthful and active.

Shop were your wants and needs are uppermost in the mind of the merchant. Shop in the store which reflects you, which you dominate. Shop where your money returns to you in better goods, better values, better service.

Shun the shop that is dumb and dark and dreary; keep away from the shop that never speaks to you, never smiles at you, never bothers about you.

Reward by your custom the merchant who lives to serve you, and who is doing his utmost to build up this community; who takes you into his confidence by means of advertisements in your local newspapers.

**Smile back at the shop which smiles at you
Shake hands with it—keep company with it—
your favor will be returned to you tenfold.**

Wheels Within Wheels
Mrs. Crawford—I was so glad to find her out when I called. This is the first time I have talked like each other, so I told her what you were going to call.

A man who tries to run an automobile on a wheelbarrow deserves a job.

Why He Didn't Understand
That woman snubbed me deliberately.

Her lips she didn't see you.

Of course she did. Didn't she know that women in the world could pass by without seeing that?

Reduce the Cost of Living
There must be a prohibitive tariff on moving vans.

What a little idea.

Not at all. Just try to live like one, and the cost of moving has almost tripled.

An Irish member of parliament is telling a story of a man who complained to three friends in England that his servant was constantly breaking chairs.

"What do you think I ought to do with her?" he asked plaintively.

The practical Englishmen said, "Get rid of her." But he was otherwise an excellent servant her master was unwilling to do that.

"Then get rid of her wages," suggested the thrifty Scot.

"The world is much good the eighth for her wages are less than the amount of damage she does."

"Then cut her wages!" said the irascible legislator.

Would you mind resting from your head on my left shoulder, dearest?

To hear you say it has marmured the heart.

Yes, and to be further away from the cigars I have in my right pocket.

That hand embraces many points in a single.

The day, then, it is always hugging the shore.

Mrs. Gramercy—"You can't judge a man by what he was before you married him. Mrs. Park—Indeed you can't. My husband used to spend

the evenings with me."

Keep the Children Well!

STRUGGLE WITH FIVE LEOPARDS

Officers of Stern-Tested Leather Lasso Lemons Relieved by Lightning

While a terrific storm raged about them, driving their big freight about like a covey of chickens, the crew of the German steamship Rheinfeind, which arrived recently in Philadelphia from Europe, had to fight off five leopards before they succeeded in subduing five frenzied leopards which had escaped from their cage.

During the storm all hands had been ordered on deck by Capt. Albert E. Schaeffer, who, in an effort to attract the pan deck it knocked the cage down in the middle of the deck.

With a scream of fright the men dashed the quieted leopards raced about the ship, leaping over the deck and fighting in an effort to climb to a place of safety. In an instant only one of the leopards was left on deck, the stoker, seized by fear when he saw the loose leopards, leaped into the sea.

Around and around the battered vessel did the quieted leopards race, until finally the ship was at a standstill and six men crowded in the corner. At the dock lead had been washed into the water and the men were forced to wade through it to reach the ship.

After an hour the leopards sighted the men and started to climb the ship, evidently intending to wait until the storm abated to advance on them.

One crawled from the group on his hands and knees to his room, prodding the door with his claws, and was evidently intending to wait until the ship advanced to advance on them.

He threw the rope across the leopards, seized by them, hauled a few yards, and when he reached the end of the rope caught and made fast. Other ropes were cast and the leopards were captured.

In the same cage of wild beasts were two tigers, a lion, a leopard, and a bear. Both were shattered, but they remained quiet on the pan deck and watched the night.

Miners Limulus Cures Distemper

What do you want?" demanded Mr. Newbold, as he confronted the tramp at the door of the bungalow. "Both air, replied the wayfarer, timidly.

Well eat, that returned the other savagely, handing out a biscuit and a pot of steaks, and you have both."

With a groan the tramp gave up reluctantly at his hostess, for he was giving away the first fruits of his literary studies at the cooking school.

It is Wise to Prevent Disease.

Many causes lead to disorders of the stomach and few are performing their functions, & it will be found that the digestive organs will speedily resume their normal condition. All vegetable substances are so blended in these pills that no other preparation could be so effective as this.

FIRE IN STOVE 70 YEARS

Primitive Cooking Apparatus in Cornwall, England

Incredibly, we seem to us to be at our command every sort of labor saving machine and device. Reminded him of the simple tools of primitive men for whom there are some parts of the world—not the most remote, either—where many of the arts of civilization have been lost.

He was fairly successful in disposing of tickets in the shop when he was called to the door to answer trouble when he canvassed the neighbors.

At a neighbor's home he tried to sell a ticket on the chock. It's a four-timerpiece...I'll look forward to your next mail, said the boy.

Hagan, capably.

Green, the old clock doesn't run, replied the boy.

Well, drawled Hogan, changing front completely, well, perhaps you have the time on the fellow who does.

Miners Liniment Cures Gout in Cow.

At a dinner given by the prime minister of a little kingdom in the Balkan Peninsula a distinguished company of gentlemen men for miles around gathered in a room for a party.

Mr. Jekyll, the prime minister, was the first to arrive, and he was followed by the prime minister of another country, who was to speak at the meeting.

When the foreigner was seated, the prime minister of the Balkans, who had been seated on the floor, said that he was the prime minister in tones of announcement. "I am going to speak at the meeting," he said, looking towards the end of the room where the watch was returned to him.

"What did he say?" asked the diplomat.

"He just mentioned the boat, glancing sideways at him. He doesn't know that I have got it back."

With a smile the family have any cooking to do, the embers are first lit, and the bread is then put over them. The dough is then put into a tin, which is placed upon the embers, and the bread is then taken with a big iron pan. The whole is covered with embers and left eighty degrees, he said, the bread is perfectly baked.

An Irish member of parliament is telling a story of a man who complained to three friends in England that his servant was constantly breaking chairs.

"What do you think I ought to do with her?" he asked plaintively.

The practical Englishmen said, "Get rid of her."

But he was otherwise an excellent servant her master was unwilling to do that.

"Then get rid of her wages," suggested the thrifty Scot.

"The world is much good the eighth for her wages are less than the amount of damage she does."

"Then cut her wages!" said the irascible legislator.

TOLD BY HIS TEETH

Tests make More Reliable in Crime Detection than Finger Prints

The case of the burglar who was recently identified in Paris by the marks on his teeth has been followed by a number of dental experts who are desirous to comment on the value of identification in crime, and the researches of Dr. Paul Prague, of Vienna, who has been working for years on the subject, indicate that a local series of experiments approaches very nearly Steven-

son's results, and that identification of the palate and teeth is a reliable method of identification, especially when the teeth are broken.

The article is entitled "Automatism," while the writer defines broadly as "any action or movement of the body or mind which occurs without the intervention of the will." The author gives cases of automatism in which the ordinary walking and normal state of the body is replaced by a series of more complex movements, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

In the third part, continues the writer, while the writer defines broadly as "any action or movement of the body or mind which occurs without the intervention of the will," the author gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc., which are unconscious of what they were doing.

The writer gives cases of automatism in which the body is compelled to move in certain ways, such as running, jumping, etc.,
